

TULIPIIPPUTM

Intelligent  *Design*
Wood pellet burners for ovens and fireplaces.

*You now have a choice:
burn wood pellets instead of firewood in
your fireplace!*

The Tulipiippu wood pellet burner for ovens and fireplaces is a technical masterpiece. Its unique design makes for high efficiency and economical use.

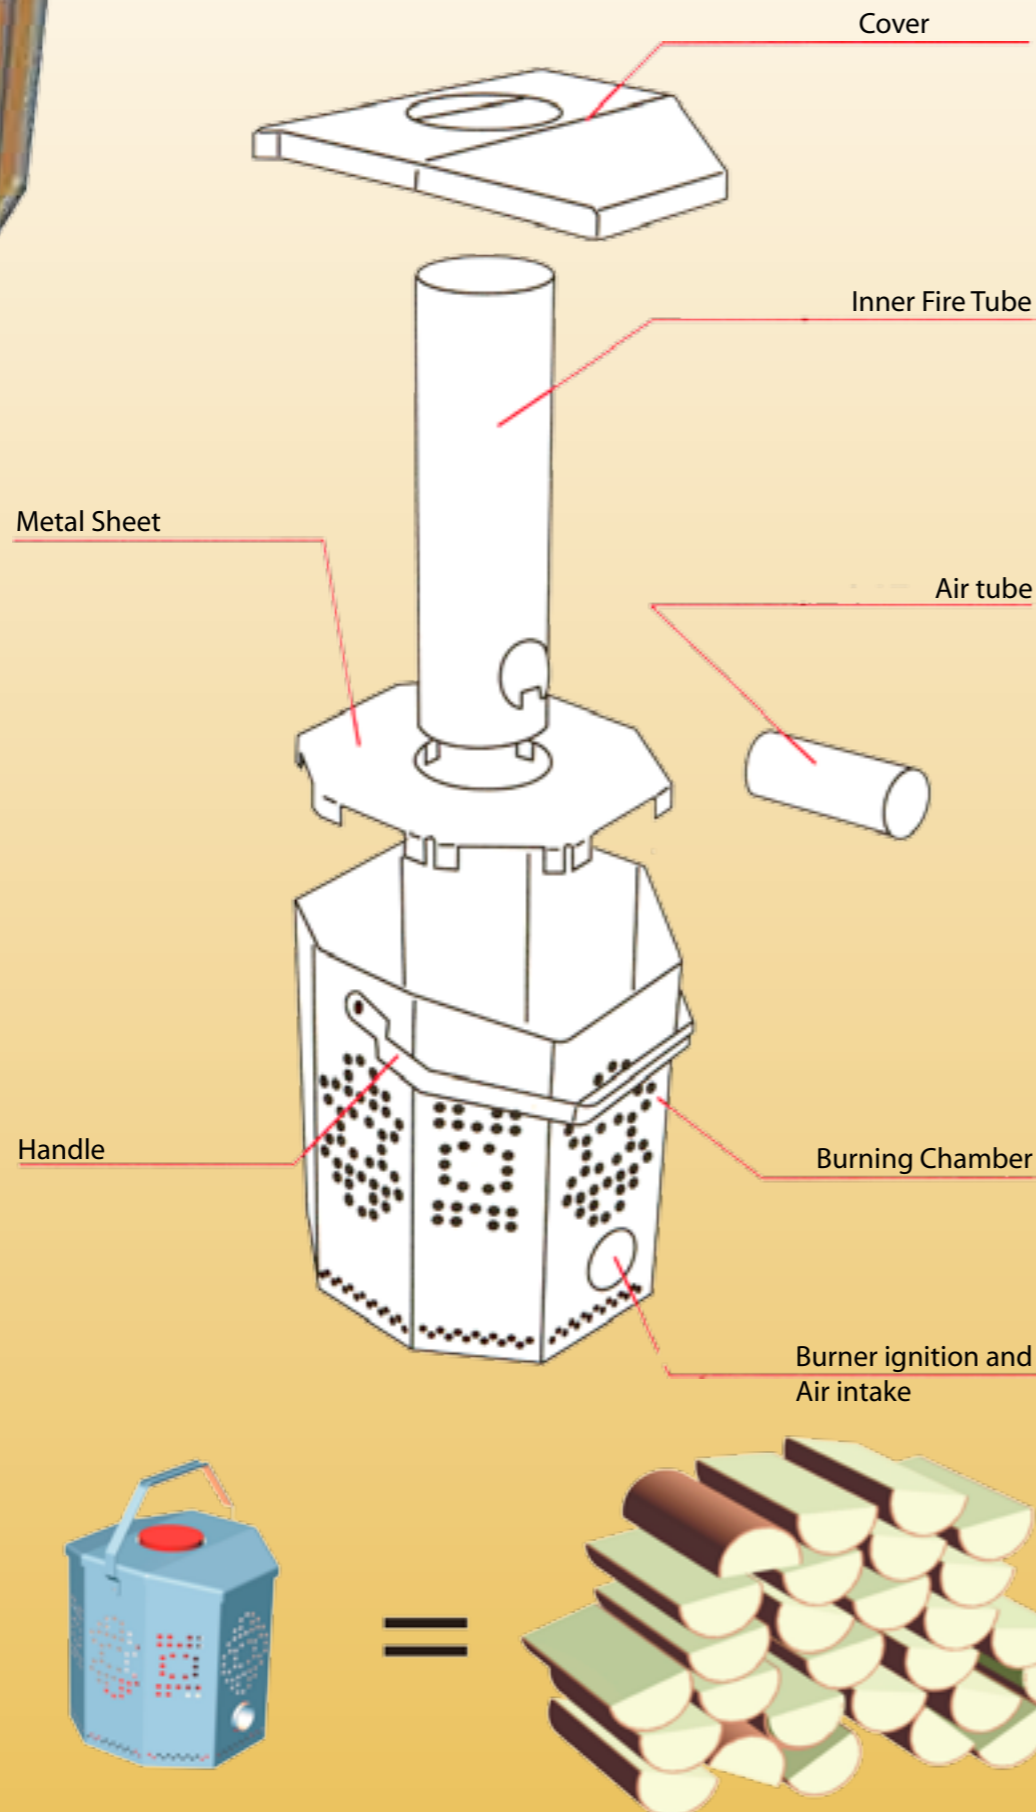

- Ecological heating (neutralisation of CO emissions)
- Easy to use
- Economically optimal
- Scientifically proven efficiency
- Smart usage of the ashes for gardening!

*The TULIPIIPPU pellet burner:
a real alternative to firewood burning!*

Tulipiippu pellet burner 30 and 50

The real alternative to log burning!

Thanks to the modern technology of the pellet burner from TULIPIIPPU, the burning of wood pellets in practically any fireplace is made possible in a way you always waited for. It is very easy, efficient and economical !

The secret of TULIPIIPPU lies in its gas burning method. The design and build of the TULIPIIPPU creates gasification of the pellets during the burning process, making complete combustion possible and leaving very little ash.

The pellet burner is a Finnish patented quality product, and the excellency of its efficiency has been proved though testing by the Finnish National Research Centre (VTT). One of the major innovations that made such results possible is the CLEAN-FIRE COMBUSTION PROCESS, permitting thorough and efficient combustion.

Model 30 kW
 Weight: 4.5 kg (10 pounds)
 Height: 31 cm (12.4 inches)
 Width: 25 cm (10 inches)
External parts:
 Stainless steel AISI 304
Internal parts:
 Carbon Steel St 37
Burning time: 1.5 hours

Model 50 kW
 Weight: 5 kg (11 pounds)
 Height: 61 cm (24.4 inches)
 Width: 32 cm (12.8 inches)
External parts:
 Stainless steel AISI 304
Internal parts:
 Carbon Steel St 37
Burning time: 2.5 hours

Both the 30 kW and 50 kW burners function the same way. The efficiency is adjusted by air intake.

The flame should be steady, and not too high so as to achieve optimum efficiency and burning time.

The TULIPIIPPU Pellet Burner is simple to use! Its ingenious design makes for added efficiency. It is practical, clean and ecologically friendly with CO emissions neutral.

In addition, the TULIPIIPPU Pellet Burners require no electrical devices of any kind.

Tulipiippu pellet burners 20 ja 15

Model 20 kW

Weight: 3.2 kg (7 pounds)
Height: 24 cm (9.5 inches)
Width: 21 cm (8 inches)

External parts:

Stainless Steel AISI 304

Internal parts:

Carbon Steel St 37

Burning time:

Approximately 1 hour

Smaller fireplaces can also be equipped with the TULIPIIPPU 20. It functions just like the other models.

The TULIPIIPPU 20 is easy to ignite: The burning time can be adjusted by varying the amount of wood pellets in the burner.

The TULIPIIPPU 20 is sturdy enough to be used all year long. Maintenance it is extremely easy: just remove the ashes after each use, and rinse with water when necessary.

Model TPP 15

Weight: 2 kg (4.4 pounds)
Height: 22 cm (9 inches)
Width: 16 cm (6.4 inches)

External parts:

Stainless steel AISI 304

Internal parts:

Carbon Steel St 37

Burning time:

appr. 40 min.

The Tulipiippu 15 Saint Pellet Burner with an integrated cooking ring is designed for extreme conditions (eg. For survival kits in catastrophe areas)
